

## ENVIRONMENTAL POLICY STATEMENT

One of our core business streams is to help our customers reduce their environmental impact.

On a Corporate level, Servomex is a subsidiary of Spectris who appoint an executive committee (Board of Directors) at local level, who are accountable for all aspects of environmental management and are committed to environmental protection and pollution prevention.

Servomex aims to provide, maintain and continually improve the environmental management system to satisfy legal and moral requirements.

Servomex recognises its responsibility, in terms of sustainable development, to the environmental surroundings in which the organisation operates, including air, water, land, natural resources, flora, fauna, humans and their interrelation. Surroundings in this context extend from within the organisation to the global system. Also, in this environmental context, Servomex recognizes that the environment presents both risks and opportunities for Servomex's operations. Through sound engineering principles, we are reducing the amount of materials in our products, and so reducing the environmental impact throughout the product life cycle.

The executive committee has appointed an Environmental Manager who has the organisational freedom and authority to review, maintain and improve the Environmental Management System within the standards required of ISO 14001.

Directors and Managers within the Company are responsible for ensuring that the activities under their control are effectively operated in accordance with the Environmental Management System and the associated documentation referenced.

The policy is posted within the company and readily available to persons working on behalf of the company, customers and the general public when requested.

Servomex Group Ltd will make adequate resources available to implement its environmental policy in full. The senior executives will meet annually to review performance and provide leadership on environmental objectives and this policy will be kept under review and revised from time to time, as appropriate.

Signed:

Trevor Sands  
President
