

SERVICE CENTER SUPPORT

REGIONAL EXPERTS COVERING
ALL OF YOUR SERVICE NEEDS

EXPERT SUPPORT
WHEREVER YOU NEED IT

The development of proactive maintenance programs will sustain the life of an analyzer, preventing the risk of failures. However, from time to time problems do occur, and in these circumstances it is critical to get the analyzer up and running again as quickly as possible.

Servomex Service Network understand the problems our customers face, so our network of Regional Service Centers are located close to our customers. Every day we receive analyzers for repair, preventative maintenance, and upgrades.

We understand that your analyzer can be critical to the operation of your business – so we endeavour to turn your analyzer around quickly and efficiently, minimizing downtime for your plant.

YOU RECEIVE

Full range of services

Regional support

Cost-effective repairs, with
no compromise in quality

Dedicated in-house team

Get the analyzer

GET THE BENEFITS

STATE-OF-THE-ART SERVICE CENTERS

Our In-House Service Centers are equipped with the latest specification workbenches, custom-designed for each of our analyzers. This ensures our maintenance and repairs are carried out to the highest quality standards.

AN EXPERT SERVICE TEAM

All Servomex Service Centers are staffed by a dedicated co-ordination team, working closely with our highly experienced repair engineers to provide a streamlined and hassle-free service. Our expert Service teams are familiar with all Servomex analyzers and able to diagnose any analyzer issue.

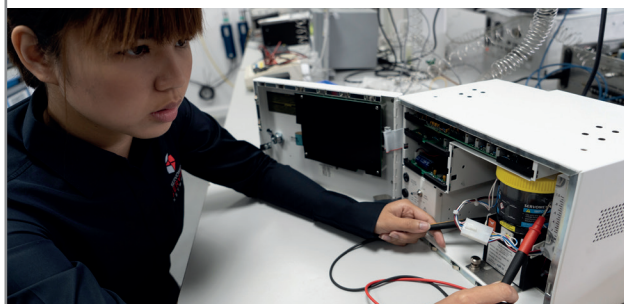

A FAST RESPONSE SERVICE

Downtime costs money – so we aim to turn your analyzer around as quickly as possible, working with local couriers to ensure the fastest possible turnaround. We even offer short term rental units to keep your business ticking over while your analyzer is being repaired.

UPGRADE YOUR ANALYZER

Our in-house teams can add or change measurements and features of your existing analyzers, exactly to your requirements – all these upgrades can be carried out in-house.
