

SERVOMEX UPTIME+

A modular
service solution
for your unique
needs.

Servomex Uptime+ is your customized service solution, designed to provide the level of support you need to meet your exact requirements.

It puts your process needs first, empowering you to overcome the application challenges you face and helping to ensure you can achieve your targets.

Uptime+ enables you to safeguard and optimize your process across the lifetime of your analytical system. Uptime+ service plan and Uptime+ service contracts offer a vast array of services, each one coming with three levels of support.

Our experts consult with you to determine what you need to meet your goals, and use that information to recommend a tailor-made support package based on the specific demands of your applications.

With Uptime+, the solution starts with you.

Get the benefits:

- **Reduced downtime**
- **Increased process time**
- **Enhanced productivity**

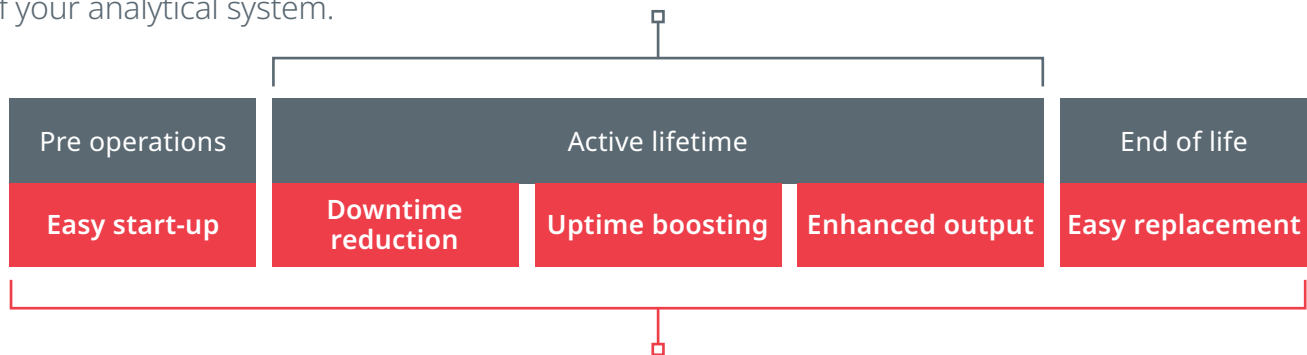

Get the right level of support: www.servomex.com/service

Improve the quality of your service support. Enhance your process outcomes.

Uptime+ Service Contract

Support your process needs from basic to complex operations with an Uptime+ Service Contract. Get maximized operational time and performance across the active lifespan of your analytical system.

Uptime+ Service Plan

Get complete support for your system and process with an Uptime+ Service Plan. From start-up to decommissioning, we help ensure optimum performance for the entire product lifecycle.

Customized support. Lifetime benefits

With three service products - Reactive, Scheduled and Performance - Uptime+ delivers the benefits you need for your process:

Reactive

Reduced downtime

- Expertise when you need it most
- A timely response when unexpected failures occur
- Minimize your production loss

Scheduled

Increased process time

- Lower risk of unplanned stoppages
- Maintain optimum system measurement accuracy
- Improve your control of TCO

Performance

Enhanced productivity

- Keep your key assets up to date
- Avoid potential disruptions
- Ensure your product knowledge is at the right level
